

Looking for suitable apps for the iPads can be confusing.

These have been chosen because:

- . They are valid learning apps (they support good maths learning)**
- . They are fun and appeal to children**
- . They are low cost**

[Mathletics Dictionary](#)

Maths Sumo (69p) fast paced mental maths questions against your partner.

Operation Math (£1.99) Secret agent themed maths game- good range of difficulty

Eggs on Legs(69p) Times tables Ghost Blasters and Multiple Wipeout- the same games that are available via website for a pc.

Motion Math (£1.49) Good range of fun activities set under the sea – super range of abilities and include fractions, decimals and percentages.

Glow Burst-(69p) This was voted the best children's maths app. It is number ordering (but including negative numbers and fractions/decimals) and is challenging enough and addictive that you may have to stop your parents/teachers playing it and reaching the top of the leader board

Number Board (free) A good variety of difficulty and requires a decent amount of reasoning and thinking ahead in the higher levels.

TribbsHD (69p) Good for developing mental calculation and reasoning.

The Squeebles range of games(from 69p to £1.49) on a range of maths topics such as times tables and fractions ... great fun!

What Time is it Mr Wolf? (69p) Great for learning to tell the time

Bee Bot (free) Voted one of the top apps for children by children. Bee Bots but in an app with different challenges.

Hands On Math (69p) Base Ten on the iPad. Great for any calculation – practise methods used in school and secure place value.
