

**Debbie Morgan (Primary Director of NCETM) brought her Cohort 8 Primary Mastery Specialist Trainees to Worlds End as part of their training:**

$\frac{4}{6} < \frac{4}{5}$

$\frac{4}{5}$  is greater than  $\frac{4}{6}$  | know  
because  $\frac{4}{5}$  is greater than  $\frac{4}{6}$  because  
the 5 is greater the denominator  
the smaller the parts are  
so  $\frac{4}{5}$  is greater
